

Mom and Dad:

Please make our house safe for our family. Let's do this simple safety inspection of our home and habits today!

Do all of our smoke alarms work?

Can we do a test to see if the smoke alarms actually wake me up when I am sleeping? Do we have working smoke alarms in every bedroom?

Are all matches and lighters put away in a safe place where I cannot get to them?

Is there a three foot area around the front of the stove where I know I am not supposed to play so I won't get burned?

Do you know that I should not be given sparklers to play with because they reach 1800 degrees and I could be badly burned?

Do we keep newspapers, clothing, and all other combustibles at least three feet away from our furnace, space heaters, and all other heat producing appliances?

Is our home address at least 4" high and easily visible from the street, even at night, so the police and fire department can find us if we need them?

Before we go to bed at night, do you perform a sweep to make sure the doors are locked, candles are all blown out, and the stove is turned off?

Do you make sure to watch me all the time around pools and lakes?

Does our babysitter know what to do if there is an emergency at our house when you are gone?

Thank you for keeping me safe!
